

**Course name: Sorting Waste in Germany**

**Remember**

*Recognize, list, describe, identify, locate*

What should your students remember after completing this course/module?

1. The different types of waste in Germany
2. What goes in each bin
3. What to do when they have special types of waste
4. A basic understanding of German vocabulary for the types of waste

Define activities that will help your students remember the subject matter of this course/module, e.g.:

1. Sorting activities for waste
2. Vocabulary review

**Understand**

*Interpret, summarize, paraphrase, compare, classify, explain*

What should your students understand after completing this course/module?

1. Classify which bin in Germany has a specific type of waste
2. The importance of properly sort the trash for the sake of the environment and participation in the community
3. How to handle special types of waste
4. The German and English vocabulary for the different types of waste

Define activities that will help your students understand the subject matter of this course/module, e.g.:

1. Students will see types of waste and decide what to do with the trash (drag and drop, multi-select).
2. Students will review terminology in German and English (click and reveal).
3. Students will be presented with compelling facts about waste management (slider).

## Apply

*Execute, use, implement, illustrate, teach, solve, modify, calculate*

How will your students be able to apply their new knowledge or skills after completing this course/module?

1. Students will be able to sort their waste appropriately into the correct bins.
2. Students will know where to go when they have waste that isn't appropriate for their bins.
3. Students will recognize the German words for the different types of waste.

Define activities that will help your students apply the subject matter of this course/module, e.g.:

Students will complete a quiz at the end that requires them to understand the different types of waste and the appropriate vocabulary for each.

## Analyze

*Compare, contrast, categorize, differentiate, investigate, deconstruct*

What analytical skills will this course/module teach your students?

1. This course will teach students how to categorize and properly sort their waste.
2. This course will give the students a basic understanding of the language associated with waste in Germany.
3. This course will help students differentiate what can go in a regular bin and what needs special handling.

Define activities that will help your analyze relevant information using their new knowledge or skills, e.g.:

1. Students will see types of waste and decide what to do with the trash (drag and drop, multi-select).
2. Students will identify the correct German vocabulary that matches the type of waste.

## Evaluate

*Critique, hypothesize, check, experiment, judge, test*

What critical thinking skills will this course/module teach your students?

1. Students will be able to judge what type of waste they have and how to handle it properly.
2. Students will be able to utilize German terminology when discussing waste.

Define activities that will help your student apply critical thinking using their new knowledge or skills, e.g.:

1. Students will complete a quiz that requires them to apply their knowledge of how to sort waste properly with their newly acquired vocabulary.
